

# LOGIN So Far

## KNOWLEDGE EXCHANGE SINCE 2013

Local Governance Initiative and Network (LOGIN) is a South and East Asia centric multi-stakeholder network aimed at aiding reform agendas in favour of greater decentralisation and strengthened role of local governments.

Established in 2013, LOGIN's membership spans over 11 countries to include elected representatives, training institutions, non-governmental organisations, government departments and inter-governmental organisations, among others.

Working in favour of accountable, transparent and inclusive local governance, LOGIN facilitates multi-stakeholder dialogue and peer-engagements amongst its members. Built on the principle of 'expert-learner' duality, LOGIN's learning methods and activities provide a platform for members to share experiences and apply insights to strengthen decentralisation processes in their countries.
